

**REMARKS**

It is our understanding that claims 1-42 are pending in this application.

**Amendments to the claims:**

We respectfully ask entry of the amendments herein to correct an inadvertently omitted edit to claim 1 (which would have brought it into closer conformity with the other claims, e.g., claim 23). A "client name assertion" is a form of "client credential" (see e.g., pg. 7, ln. 24-27 of the specification). The latter terminology, however, is more widely understood in the industry, particularly now as the industry has evolved since this application was filed. To avoid confusion, the "credentials" previously recited in claim 1 are now amended to "temporary credentials".

No new subject matter is added by these amendments, with support for them present in the application where already noted.

**CONCLUSION**

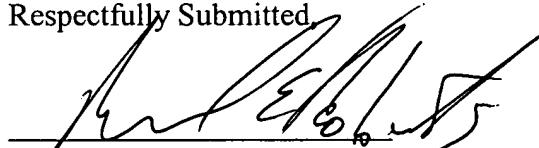

Applicant has endeavored to put this case into complete condition for allowance and respectfully asks that all claims presently in the case be granted.
